

Please don;t pull xm sat programming or the local traffic and weather. If the local stations offered better coverage and more often updates, I would understand but traffic and weather every 15 minutes is to slow for a fas paced city like Balt. I live 63 miles away so my reception is crappy until I'm closer to town. By then I've had to make choices on what roads to take wthout knowing traffic problems. XM Sa radio provides me with 24/7 traffic so I can better make my way to work and better assist police and emergency vehicles by staying out of their paths going towards accidents.

Sincerely,  
Robert Patrick Jr
